

Elongated Hexagons - aka Lozenges

Used for wide sashes – including Jewel Boxes, Jacob's Ladders etc

to see how these look when turning corners – go to the Sashes catalogue pages

Statler Sticher owners: if the design is not a p2p one then p2psu variations are included.

p2psu patterns are placed using the p2p function,

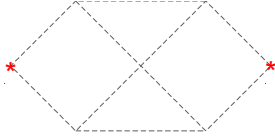

– but they sew out as regular blocks, never sewing into those registration points

Registration points are at (or near) the piecing intersections.

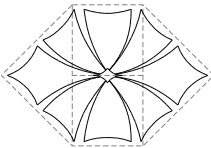

This means very quick and very accurate placement of the designs,

rotational issues and stretching being done as you click!

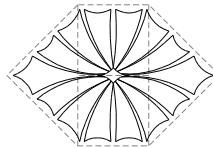

AUDITION: *always control for height.*
